

LISTING OF THE CLAIMS

The following is a complete listing of all the claims in the application, with an indication of the status of each:

- 1 1. (Currently amended) A method for backing up applications of a portable cellular  
2 phone comprising:
  - 3 a step of storing backup application information to be used in said portable  
4 cellular phone and identification information used to identify said portable cellular  
5 phone in a backup device;
  - 6 a step of transferring, when said application information is backed up, said  
7 application information with said identification information being added from said  
8 backup device to said portable cellular phone;
  - 9 a step of said portable cellular phone comparing the transferred identification  
10 information with identification information of said portable cellular phone; and  
11 a step of copying said backup application information only when both of said  
12 identification information match each other.
- 1 2. (Original) The method for backing up the applications of the portable cellular  
2 phone according to Claim 1, wherein said identification information is a manufacture  
3 serial number and/or a telephone number of said portable cellular phone.
- 1 3. (Original) The method for backing up the applications of the portable cellular  
2 phone according to Claim 1, wherein said portable cellular phone performs processing  
3 of verifying whether or not said applications transferred from said backup device run  
4 normally and does not copy said transferred application if said application does not  
5 run properly.
- 1 4. (Original) The method for backing up the applications of the portable cellular  
2 phone according to Claim 1, wherein said portable cellular phone stores said  
3 application information having undergone the verification processing in said portable

4 cellular phone in an executable format.

1 5. (Original) The method for backing up the applications of the portable cellular  
2 phone according to Claim 3, wherein said portable cellular phone stores said  
3 application information having undergone the verification processing in said portable  
4 cellular phone in an executable format.

1 6. (Original) The method for backing up the applications of the portable cellular  
2 phone according to Claim 1, wherein said portable cellular phone terminates  
3 processing when said identification information transferred from said backup device  
4 does not match the identification information of said portable cellular phone.

1 7. (Original) The method for backing up the applications of the portable cellular  
2 phone according to Claim 1, wherein said portable cellular phone, when said portable  
3 cellular phone uses said application information being stored in said backup device at  
4 a time of changing a type of said portable cellular phone, compares said identification  
5 information transferred from said backup device with said identification information  
6 of said portable cellular phone and copies said transferred application information  
7 only when both of said identification information match each other.

1 8. (Original) The method for backing up the applications of the portable cellular  
2 phone according to Claim 1, wherein, when data is transmitted and/or received  
3 between said portable cellular phone and said backup device, information indicating a  
4 mode is added to said data.

1 9. (Original) The method for backing up applications of the portable cellular phone  
2 according to Claim 1, wherein said application is a Java application.
